Education

University of California, Irvine — Expected Graduation: Jun 2028
Bachelor of Science in Computer Science — Irvine, CA

Experience

World Wide Technology — Jun 2026 – Present
Software Engineer Intern — St. Louis, MO

- Enhanced an internal Java Spring Boot financial reporting API by adding a new filtering parameter, enabling VPs to drill into regional profit & loss reports to individual business units for more granular performance visibility.
- Built a Project Management Hub integrating Smartsheet with Power Automate via webhooks, reducing duplicated work through Claude-driven similarity scoring across a supported scale of 10,000+ organizational projects.
- Created a RAG-based chatbot using Azure OpenAI to unify documentation and project context across 3 teams, improving the understanding of cross-team dependencies and reducing time spent manually locating information.

Opal — Dec 2025 – May 2026
Software Engineer Intern — San Francisco, CA

- Built data pipelines using AWS Lambda to process and store 300+ candidate profiles in DynamoDB, reducing mentorship matching cycle time from 7+ days to minutes.
- Streamlined RESTful API endpoints using Python to handle Slack webhook events and real-time user interactions, processing 150+ requests daily with 99.9% uptime.
- Designed and implemented a mentorship matching dashboard using React.js and Tailwind CSS, improving the experience for 30+ SWE++ students at Santa Clara University.

Projects

RESTful Sports Analytics API | *Java, Spring Boot, AWS (EC2, S3, RDS)*

- Developed a Spring Boot JPA module to manage player statistics, implementing CRUD operations, dynamic search, and team or positional-based filtering.
- Created and configured service and initialization components using dependency injection and transactional logic.

AI-Powered 3D Real Estate Design Platform | *TypeScript, Python, C#, React.js, Next.js*

- Developed a web-based 3D interior design tool using Unity WebGL and React.js, allowing users to navigate and furnish virtual estates in a first-person environment.
- Architected a search pipeline using Gemini 2.5 to convert user images into semantic search queries, scraping 1000+ retail listings via SERP API to source 2D reference assets for 3D model generation.
- Integrated Tencent's Hunyuan 3D-2 generative AI model to transform 2D images into 3D assets (500k+ faces).

Study Room Booking Application | *JavaScript, React.js, Next.js, Tailwind CSS, Material UI*

- Built a study room reservation web app using React.js, featuring real-time search and custom filtering.
- Integrated Anteater API with debounce search optimization and error-handled data fetching of 100+ study rooms.

Leadership

Google Developer Group on Campus at UCI — Dec 2025 – Present
President — Irvine, CA

- Managing chapter operations and a team of 10 officers to execute events, grow membership, and connect a developer community of 200+ students with industry professionals and opportunities.

Technical Skills

Programming Languages: Java, Python, TypeScript, JavaScript, C++, HTML, CSS
Frameworks/Databases: Spring Boot, React.js, Next.js, PostgreSQL, MongoDB
Cloud & DevOps: Azure (App Service, Blob Storage), AWS (EC2, S3, RDS, Lambda, DynamoDB), Docker
Tools: Git, CI/CD, Postman, RESTful APIs, GitHub Copilot, Claude Code, Power BI, Power Automate
